DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 & 14-18, drawn to an apparatus, classified in class 015, subclass 320.
 - II. Claims 8-13, drawn to a method for cleaning a garment, classified in class 008, subclass 148.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be practiced by another and materially different process such as process for cleaning carpets, furniture, floors, drapes, vehicle interiors, and the like, which may or may not include different method step (i.e. not requiring the method steps claimed).
3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required

Art Unit: 1746

because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
